

Industrial Intelligence. Smarter Operations. Better Results.

Powerful HMI/SCADA, analytics, and AI solutions
that connect your operations and drive performance.

VISUALIZE

Real-time visibility
across your
operations

ANALYZE

Turn data into
insights that
improve
performance

PREDICT

AI and machine
learning for
smarter
decisions

OPTIMIZE

Optimize uptime,
efficiency, and
profitability

ADISRA is redefining industrial automation.

Transform
Data into
Intelligence

Deliver
Insight for
Better Decisions

Provide
Foresight for
What's Next

Empower
Manufacturers, OEMs
and Integrators

Intelligent. Adaptive. Accessible. **Real Results.**

A complete, scalable platform from rapid development to intelligent operations to predictive intelligence.

ADISRA RapidView

A powerful no-code environment that enables you to build and deploy HMI applications faster than ever.

ADISRA SmartView

Transform real-time data into intelligent operational insight.

HMI/SCADA with rule-based expert system and machine learning.

InsightView

Turn operational data into measurable performance improvement.

OEE, analytics, and energy management in a unified platform.

KnowledgeView

Predict and prescribe the right actions to prevent issues and optimize operations.

Predictive and prescriptive insights with explainable AI and operational context.

ADISRA RapidView is a ready-to-deploy HMI solution for OEMs, machine builders, and industrial facilities that need fast visualization, alarming, trending, recipe management, and historical data collection—without the complexity of traditional SCADA systems.

Key Benefits

- Ready-to-use device templates
- Minimal engineering effort
- Built-in dashboards and reports
- Alarm management and trending
- Recipe management
- Audit trail and historian
- Windows and Linux support
- Fast deployment

Expandable with **ADISRA SmartView** for advanced HMI/SCADA functionality, industrial connectivity, remote management, machine learning, and operational intelligence.

ADISRA SmartView

Powerful HMI/SCADA. Intelligent Operations.

Advanced Visualization

Broad Connectivity

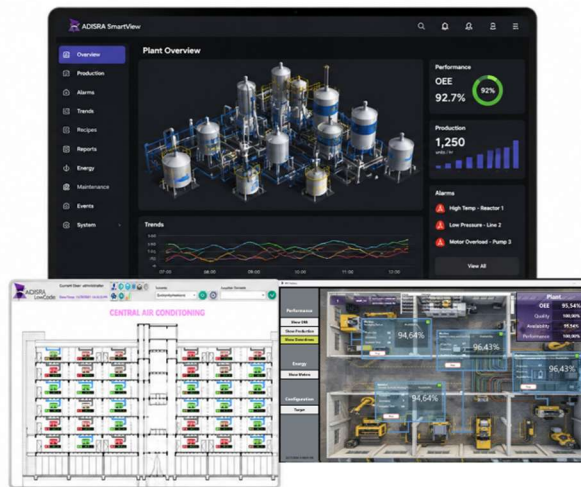

Intelligence Built-In

Remote & Secure

Scalable & Reliable

Benefits

- Faster deployment and lower engineering costs
- Built-in operational intelligence without external AI tools
- Secure access anywhere, anytime
- Scales from single machines to enterprise operations
- Future-ready platform for Industry 4.0 and IIoT initiatives

ADISRA SmartView is a unified HMI, SCADA, rule-based expert system, and machine learning platform that enables organizations to visualize, control, and optimize operations from the edge to the cloud. It scales from a single machine to enterprise-wide deployments on a single powerful platform.

Key Features

- HMI, SCADA, Expert System, and Machine Learning in one platform
- Runtime configuration and template-based development
- MQTT, OPC UA, OPC DA, Web APIs, industry-standard drivers, database connectivity, and extensive integration capabilities.
- HTML5 web access from any device
- FDA 21 CFR Part 11 support
- Windows, Linux, edge, and cloud deployment

InsightView

Turn Data into Performance.
Drive Real Results.

InsightView transforms operational data into measurable performance improvements by unifying OEE, the Six Major Losses, energy management, and advanced analytics into a single, purpose-built platform for the industrial mid-market.

OEE & Six Major Losses
Identify losses.
Improve uptime.

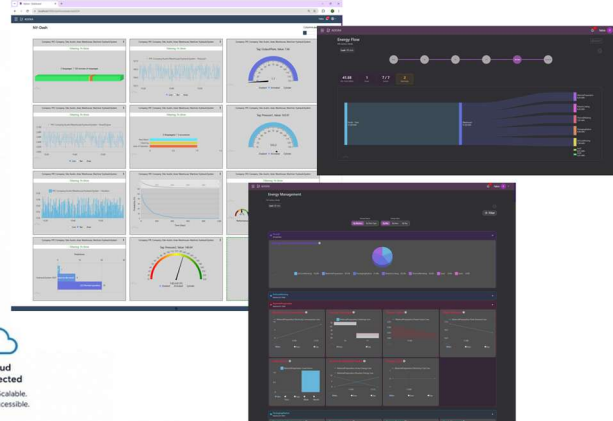

Energy Management
Monitor consumption.
Reduce cost.

Advanced Analytics
Uncover insights.
Predict outcomes.

Cloud Connected
Secure. Scalable.
Always accessible.

One Platform. → Complete Visibility. → Measurable Impact.

Improve OEE

Lower Costs

Optimize Energy

Drive Growth

Designed for the industrial mid-market, InsightView delivers enterprise-level visibility without the complexity, cost, or staffing requirements of traditional solutions.

Benefits

- Improve productivity and asset utilization
- Reduce downtime and operational losses
- Lower energy consumption and costs
- Standardize KPIs across plants and machines
- Gain actionable insights for continuous improvement
- Scale from a single site to multiple facilities

ADISRA InsightView transforms operational data into measurable performance improvements by combining OEE, the Six Major Losses, energy management, and advanced analytics in a single platform.

Key Features

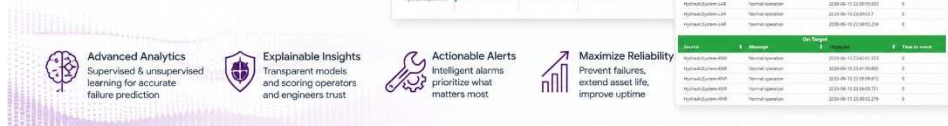

- OEE Monitoring
- Six Major Losses Analysis
- Energy Management
- Advanced Analytics & Dashboards
- Multi-Site Performance Visibility
- Open HMI/SCADA Integration

ADISRA KnowledgeView

Predict. Prevent. Perform.

KnowledgeView delivers practical, explainable **predictive maintenance** by combining supervised and unsupervised learning, enabling industrial teams to prevent failures, extend asset life, and improve reliability without enterprise complexity.

Built for the industrial mid-market, KnowledgeView turns operational data and expert knowledge into **actionable predictions** that operators trust, integrators can deploy, and OEMs can productize.

ADISRA KnowledgeView delivers practical, explainable predictive maintenance by combining supervised and unsupervised machine learning to identify failures before they occur. Designed for the industrial mid-market, it transforms operational data into actionable insights that improve reliability, reduce downtime, and extend asset life, without enterprise complexity.

Key Features

- Hybrid supervised and unsupervised learning
- Anomaly detection and root-cause analysis
- Real-time monitoring and early warning alerts
- Advanced machine learning algorithms
- Customizable dashboards and analytics

Benefits

- Reduce unplanned downtime
- Lower maintenance costs
- Extend asset life
- Improve reliability and productivity
- Enable data-driven maintenance decisions
- Deliver predictive insights operators can trust

Customer Service That Sets Us Apart

At ADISRA, our commitment to customers goes beyond software. We provide responsive, personalized support to help you get up and running quickly, maximize the value of your investment, and build a long-term partnership for success.

Whether you need technical assistance, project guidance, training, or product information, our team is here to help.

Connect with us your way:

- Email our support (support@adisra.com) and sales teams (info@adisra.com)
- Chat with us online
- Speak directly with an ADISRA expert (833-523-4772 or 512-993-2949)
- Schedule a personalized demo at your convenience through our website

From your first evaluation to long-term deployment, ADISRA is committed to being a trusted partner every step of the way.

Distributors

Join ADISRA's growing global distributor network. We are always interested in building strong partnerships with organizations that share our commitment to innovation, customer success, and excellence in industrial automation. By working closely with our distributors, we deliver advanced automation solutions, exceptional support, and long-term value to end users worldwide.

System Integrators

ADISRA is dedicated to helping system integrators succeed by providing the tools, training, and support needed to deliver outstanding results for customers. Our **Registered System Integrator** and **Certified System Integrator** programs offer valuable benefits, including training, temporary software licenses, technical resources, marketing visibility, and ongoing partnership opportunities.

OEMs and Machine Builders

We understand that software is just one component of your overall solution. ADISRA works closely with OEMs and machine builders to develop scalable, cost-effective solutions that enhance machine performance, simplify deployment, and create added value for customers. Our goal is to help you differentiate your products while reducing development time and complexity.

Educational Program

ADISRA is passionate about supporting education and fostering innovation in industrial automation. We partner with universities, technical schools, research organizations, and training centers by providing educational software licenses, training resources, and technical support. Through these collaborations, we encourage the exchange of ideas, support hands-on learning, and help prepare the next generation of automation professionals.

About ADISRA

Empowering industrial operations with smart, scalable, and innovative software solutions.

Innovation
Built by industry experts, driven by real-world experience.

Customer Focused
We listen, support, and succeed together.

Scalable Solutions
From a single machine to enterprise-wide operations.

Trusted & Reliable
Secure, robust, and built for industrial environments.

Smart Software.
Smarter Operations.
Better Results.

About ADISRA

Founded in 2017 in Austin, Texas, ADISRA is a global industrial automation software company dedicated to helping manufacturers operate smarter, more efficient, and more connected facilities. As a privately held organization, we have the agility to innovate quickly, respond to customer needs, and deliver practical solutions that create measurable business value.

Our mission is simple: empower industrial organizations with software that improves productivity, increases process efficiency, and transforms operational data into actionable intelligence.

What sets ADISRA apart is the experience behind our technology. Our leadership team and founders have decades of hands-on experience in industrial automation, HMI/SCADA systems, IIoT, artificial intelligence, and industrial analytics. We understand the challenges manufacturers face because we have spent our careers working alongside plant operators, engineers, system integrators, and OEMs worldwide. This real-world perspective drives the design of every ADISRA solution.

Today, ADISRA has a growing global presence, serving customers across North America, South America, Europe, Asia, the Middle East, and Africa. In addition to our headquarters in Austin, Texas, we maintain a regional office in São Paulo, Brazil, and work closely with an expanding network of distributors, system integrators, OEM partners, and technology alliances worldwide.

Our solutions are designed specifically for small- and mid-sized manufacturers, machine builders, OEMs, and system integrators who need enterprise-class capabilities without the complexity, cost, or overhead of traditional industrial software platforms. By combining advanced technology, ease of deployment, competitive pricing, and exceptional customer support, ADISRA delivers a modern automation platform that helps customers compete and grow in an increasingly connected world.
